

The Original
DRAIN ALERT[®]

DAU-RS with a Deep Well Reservoir

Patent

- Patent US7,009,125B1

Electrical

- 3 Amps running – 1.5 Amps on break
- 24 Volt A/C – 1.5A GP
- Industrial Control Equipment

Certification

- UL Certified 508
- #E233066

Applications

- Drain pan emergency overflow shut off switch

General Description

- The Drain Alert DAU-RS with a deep well reservoir is designed to shut off the air handler in the event that the drain line should become clogged to prevent water overflow and subsequent damage.
- Hand tighten only

Features

- Newly designed and engineered to be compatible with all makes and models of air handlers
- New vertical deep well rotating head water level control switch
- Convenient translucent unit for quick visual inspection of water presence
- Break red or yellow wire
- Quick install with female rotating head for easy mounting and dismounting for clean-up
- Compact to fit in vertical and horizontal applications
- Versatile for primary and auxiliary drain pan outlets
- Includes male threaded adaptor
- For Trane Hyperion model: extended male adaptor included
