Enjoy Luxurious Warmth with Amana® Brand Quality

Americans have been relying on long-lasting Amana brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable counter-top microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana heating and air conditioning products. From the technology behind our premium heat exchanger to the inclusion of high-quality filter driers in each of our air conditioners and heat pumps, we remain committed to the Amana brand's legacy of providing consumers with heating and cooling products that are built to last.

Heating Performance for Maximum Comfort

Energy efficiency is key to controlling the cost of heating your home. This furnace's 92% AFUE rating means 92 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of every \$1.00 of heating energy expense warms your home. The remaining 40 cents is lost energy – wasteful and expensive.

Quiet You Can Count On

Your Amana® brand AKSS92 Furnace uses a multi-speed blower motor and sound-isolated blower assembly to reduce the noise levels common in other furnaces without these features. Add an insulated, heavy-gauge steel cabinet, and the result is...quiet comfort.

Unmatched combination of performance, efficiency and affordability. That's just what you'll get with the Amana brand.

Reliability and Long Life

The heart of any furnace is the heat exchanger. Our stainless-steel tubular heat exchanger and stainless-steel recuperative coil have been tested to industry standards.

For further safety and reliability, we also include a quiet, efficient hot surface igniter that helps ensure safe start-ups and maximum igniter life.
