ECONOMY STANDOFF REGULATORS

UNIVERSAL ECONOMY STANDOFF REGULATOR

The Universal Economy Standoff Regulator from Duro Dyne is a hand operated elevated regulator designed for use with 1/4" or 3/8" square rod on externally insulated duct. The unique 10 degree foot allows the same regulator to be used on both square or round ductwork, alleviating the need to stock multiple regulators. It is offered in four standoff heights: 1", 1-1/2", 2" & 3". The handle is locked in place with a heavy duty high torque stamped wing nut and clearly shows damper position with embossed designations for open and closed. Reinforcing gussets in four locations add to the rigidity of this regulator. An optional score and Heto Notch allows the UESO to work for multiple damper fitting applications including Hetos.

90° ECONOMY STANDOFF REGULATOR FOR SQUARE DUCT

The 90° Economy Standoff Regulator from Duro Dyne is a hand operated elevated regulator designed for use with 1/4 in or 3/8 in square rod on externally insulated duct. It is offered in four standoff heights, 1", 1-1/2", 2" & 3". The 16 gauge handle is locked in place with a heavy duty high torque stamped wing nut and clearly shows damper position with embossed designations for open and closed. Reinforcing gussets in four locations add to the rigidity of this regulator. An optional score and Heto Notch allows the 90° ESO to work for multiple damper fitting applications including Hetos.

DURO-TWIST™ REGULATORS

The Duro-Twist is a hand operated elevated regulator designed for use with square rod on both square and round externally insulated duct. It is offered in four standoff heights: 1", 1-1/2", 2" & 3". The Duro-Twist is engineered with a strong friction resistance so it stays set without any need to lock it in place. The high visibility yellow handle allows it to be easily found in the field on wrapped duct. The handle position illustrates damper blade position on the outside of the ductwork.

DYNA-CLICK® REGULATORS

Dyna-Click is the latest in self-locking regulators offered by Duro Dyne. This 15 position indexing regulator features a triggerless 3/4" twist locking nut that fixes the regulator in place once set. Designed for use with square rod on both square and round externally insulated duct, it is offered in two standoff heights, 1-1/2" & 2". The Dyna-Click is engineered with a heavy duty spring so it stays set once clicked into place. The high visibility yellow handle allows it to be easily found in the field on wrapped duct.

QUADLINE™ REGULATORS

SETS AND PARTS (CONTINUED)

1/2" SHAFT LOC QUADRANT SETS (FOR DAMPERS UP TO 30")

"Shaft Loc" Quadrants are stamped of heavy gauge steel and clearly indicate the position of the damper. The quadrant handle (available for either 1/2" square or round shafts) is unique in that it locks the shaft of the damper to it by means of a powerful friction holding device strong enough to cut into the damper shaft eliminating damper rattle. The shaft is easily locked with 1/2" open end wrench. Available for square or round ducts.

SPEC-SEAL™ UNIVERSAL REGULATOR & SET

The Spec-Seal Universal Regulator Set utilizes a special rubber seal for applications up to 500°F constant temperature. It eliminates leakage and rattle via the Shaft Loc Mechanism in high pressure systems. The handle's unique design utilizes a highly-visible orange plastic cover showing the damper position. This unit, made of heavy-gauge, zinc-plated steel, accommodates four styles of end bearings: 3/8" and 1/2" with both round or square bearing shafts. It is also available in stainless steel. Individual parts available upon request.

Select items available in stainless steel. See page 18.

Each Set Consists of:

- Regulator
- 2 Rubber Seals
- 2 Metal Washers
- 2 End Bearings
- End Bearing Support

UNIVERSAL REGULATOR™

- Universal - one regulator for 3/8" and 1/2"; round or square rods.
- Clamp on handle for snug and rattle free fit to bearing or rod.
- Unique "quick set up" handle allows shift from 1/2" to 3/8" without disassembling the regulator.
- Shaft loc mechanism to eliminate rattle
- High visibility handle; shows damper direction.
- Heavy gauge, zinc plated steel.
- Optional Seal Kit - available for low leakage applications.
- Also available in Stainless Steel - Please see page 19.

STAMPLINE REGULATORS

FOR CONTROLLING SMALL DAMPERS

1/4" "JIFFY" REGULATOR SETS (FOR DAMPERS UP TO 10")

These efficient, low cost, heavy gauge, plated steel regulators install in a "jiffy" by slipping the washer and handle over the threaded square end bearing. The wing nut locks the damper in position. The position of the handle indicates the position of the damper in the duct. For use on round or square ducts.

1/4" "JIFFY" REGULATOR SETS		
ITEM#	CODE	SET CONSISTS OF
8039	KS7	KP5 1/4" threaded bearing, handle; KP-6 spring loc bearing, bevelled wingnut & washer
8046	KS7L	KP5L 1/4" long threaded bearing, handle; KP-6L long spring loc bearing, bevelled wingnut & washer
Packed 10 Per Carton; 10 cartons per box.		
8102	JB1	KP5 1/4" threaded bearing, handle; wingnut & washer
8220	JB1L	KP5L 1/4" long threaded bearing, handle; wingnut & washer
8295	JB1XL	KP5XL 1/4" extra long threaded bearing, handle; wingnut & washer
Packed 100 Per Carton.		

1/4" DIAL REGULATOR SETS AND BEARINGS (FOR DAMPERS UP TO 10")

These heavy gauge plated steel regulators are among the most popular on the market. They minimize air leakage and reduce rattle. A wing nut locks the damper in position, yet permits quick readjustment. The dial shows the damper position at a glance. The regulator mounts easily on round or square ducts.

1/4" DIAL REGULATOR SETS		
ITEM#	CODE	SET CONSISTS OF
8040	KS14	K-2 regulator; KP-8S square end bearing; KP-8R round end bearing
8041	KS14S	K-2 regulator; KP-6 spring loc bearing; KP-8S square end bearing
8047	KS14SL	K-2 regulator; KP-6L long spring loc bearing; KP-8L long square end bearing
7384	KS14SLS	K-2 regulator; KP-6 spring loc bearing; KP-8XL extra long square end bearing
Packed 10 Per Carton; 10 cartons per box.		
8056	K2	1/4" regulator only
Packed 100 Per Carton.		

FOR CONTROLLING LARGER DAMPERS

3/8" DIAL REGULATOR SETS AND END BEARINGS (FOR DAMPERS UP TO 20")

The following sets and parts are the same as the 1/4" size shown above except designed for larger dampers. The 3/8" bearings and regulator are suitable to use on round as well as square duct. Clear markings on the regulator indicate the damper position which can be locked securely by a wing nut. The regulator only is also available in stainless steel - see page 18.

3/8" dial regulator available in stainless steel. See page 18.

3/8" DIAL REGULATOR SETS		
ITEM#	CODE	SET CONSISTS OF
8044	KSR19	KR-3 regulator; KP-9R round end bearing; KP-9S square end bearing
8045	KSR19S	KR-3 regulator; KP-7 spring loc bearing; KP-9S square end bearing

7383	KSR19SLS	KR-3 regulator; KP-7 spring loc bearing; KP-9XL extra long square end bearing
Packed 1 Set Per Carton		
8058	KR3	3/8" dial regulator only
Packed 100 Per Carton		

3/8" "WEDGE-LOC®" REGULATOR SETS (FOR DAMPERS UP TO 20")

This attractive rectangular regulator features exclusive "Wedge Loc" action which firmly locks the bearing to the regulator handle when the damper is set - preventing rattling. Heavy construction, minimum air leakage and easy adjustability make this ideal for large dampers in round or square ducts.

3/8" WEDGE 'LOC' REGULATOR SETS		
ITEM#	CODE	SET CONSISTS OF
8042	KS19	K3 regulator; KP-9S spring end bearing; KP-9R round end bearing

SPECLINE® REGULATORS

MINIMUM LEAKAGE DAMPER REGULATORS

Specline Regulators are designed for minimum leakage applications. Each regulator is comprised of a frame, an indicator handle, a serrated cast alloy core and a cast alloy nut. Serrations on the cast alloy core mesh with serrations in the frame to firmly lock the regulator in position. A spring washer situated between the core and the cast frame allows for smooth non-binding adjustment.

- All SR and SRH type regulators include a cast alloy frame and a neoprene frame gasket.
- The SRHS and SRS utilize a stamped frame and include a neoprene frame gasket.

JIFFY DAMPERS

The "JDS" Series Jiffy Damper offers the contractor a quality round damper at a cost lower than most shop-made dampers. The Duro Dyne JDS series utilizes quality Rapit Spring and Rapit Solid End Bearing sets. (Packed 10 per carton only.)

The "JD" Series Jiffy Damper offers added economy in those applications where a supporting solid tail bearing is not required on the damper. The Duro Dyne JD Damper utilizes one Rapit Spring End Bearing. (Packed 10 per carton only.)

The "JDEH Series Jiffy Damper offers an inexpensive alternative for low pressure applications. The Duro Dyne Economy Damper utilizes one threaded stud as a support bearing. (Packed 100 per carton only.)

The Heavy Duty Jiffy Damper (HDJD) offers an economical alternative to in shop damper fabrication. It is manufactured of 22 gauge galvanized steel blades and comes pre-assembled. The 3/8" square rod extends 3 inches beyond the blade. The HDJD is compatible with Duro Dyne's ESO damper regulator assembly. (Packed 10 per carton only.)

HAMMER ON DAMPER HARDWARE & ACCESSORIES-

'RAPIT'[®] DAMPER REGULATOR

The **RAPIT** is an inexpensive, rattle-free regulator for quick installation on balance or splitter dampers. It is formed from rust-resistant, heavy gauge, galvanized steel and installs in seconds. The Rapit will penetrate and secure to round or rectangular damper blades up to 24 gauge steel. It has a fully retractable bearing of zinc alloy, threaded to accept a 5/16-18 wing nut and a handle that indicates the damper position. It's as easy to use as 1-2-3.

1. Slip the bearing over the edge of the damper at the bearing line.
2. Lay the assembly on any firm surface and rap the prong with a hammer. One blow drives the prong through the damper blade, holding it securely to the damper.
3. When hit with a hammer, the prong will automatically form up tight by the anvil, which is built into the bottom of the "Rapit" Bearing.

Note: Not recommended for use in systems over 300 °F.

RAPIT REGULATOR SETS

ITEM#	CODE	CONSISTS OF:
8087	RB56	1 RB-50 Rapit spring bearing; 1 RP-3 washer; 1 RP-2 wing nut

SLIDE RAPIT[®] EXTENSION

The Slide Rapit Extension provides a fast method for extending the length of a rapit spring end bearing 2". There is no need for tools; just twist the extension fork over the threaded bearing and slip the sleeve over the joint. Slide Rapit Extensions can also be combined to accommodate liner thicker than 2".

MULTI-BLADE DAMPER HARDWARE

NEVA-BIND™ DURO BLADE KIT FOR PARALLEL DAMPERS

Duro Dyne's "NEVA-BIND" Linkage Bracket will always align itself to assure smooth, non-binding operation even on the heaviest damper blades. Above, or at unequal distance from the blade axis, it is capable of adjusting itself all four ways, in-out, up-down, sideways and rotation. Each carton contains all necessary hardware for one blade of a parallel multi-blade damper.

PARALLEL		
ITEM#	CODE	BEARING SIZE
2002	BK2	1/2" ID.

OPAX® BLADE KIT FOR OPPOSED ACTION DAMPERS

Opposed Action Dampers minimize turbulence and the control of the air is more linear. Neva-Bind, 4 way self-adjustability which Duro Dyne "OPAX" kits feature, automatically compensates for any construction inaccuracies as well as maintaining linear operation and critical dimensions between linkage points. "OPAX" provides opposed action of damper blades and holds the blades rigidly in position eliminating rattle or flutter. These linkage kits contain all the necessary hardware for two opposed action damper blades.

OPPOSED

2004	BKO4	1/2" ID.

DAMPER ASSEMBLY UTILIZING SHOP MATERIALS

A. MAKING THE FRAME

(Same for both parallel and opposed dampers)

- Cut a piece of channel for the frame 1/4" less than the duct size, for clearance.
- SIDE FRAME:**
 - Mark off 5/16" from each end.
 - Divide the section inside these marks into as many parts as there are blades required.
 - Mark for each pivot at the center of each blade section (b).
 - Drill or punch a 5/8" hole at each pivot (c). Insert self-oiling bushings (tap fit).
- Weld the sides and bottoms of the frames. Be sure to keep them square.
- On large frames weld on corner braces to keep the frame square. Place any braces on the side of the frame which will not interfere with blade movement. Attach top and bottom end stops, if required. Cement felt, if required, with insulation adhesive.

B. MAKING THE BLADES

Same for both parallel and opposed dampers

1. Material:

Gauge	Blade Width	Activating Brackets Required per blade
20	to 36"	1
16	to 48"	1 or 2
12	to 52"	2

2. CUT:

- "WIDTH" dimension 3/16" less than the inside of frame.
- "HEIGHT" dimension: Allow for approximately 7/8" "shrinkage" due to forming; approximately 1/4" blade overlap; approximately 3/16" end clearance to frame.

3. MARK:

Mark the blades as shown and bend on the scribe lines.

C. MOUNTING THE HARDWARE "OPAX" HARDWARE

Attach the brackets as shown in drawing "B". (Always drive a "lo" blade, never a "hi" blade.)

Distance C from center of "V" in blade to center of mounting holes on LO bracket. (Scribe mark on bracket).

Dimension "B"	Distance "C"
5"	1"
6"	1-3/16"
7"	1-1/4"
8"	1-5/16"
9"	1-3/8"
10"	1-3/8"
11"	1-7/16"
12"	1-1/2"

PARALLEL HARDWARE

Attach the brackets at the center of blade.

Lean bracket here, against the edge of the "V"

DURO-BRACKET

OPPOSED DAMPER "B"

D. ASSEMBLING THE DAMPER

- Lay the damper frame flat on the bench.
- Place the blades inside the frame in the approximate required position (correct overlap, etc.)
- Place 2 bearing pins in each center blade groove.
- Slide the pins under the straps (loosen the set-screws) and into the frame. Tighten the strap set-screws.
- Attach all linkage rods.

SLIDE PINS

With Duro Dyne's complete line of Damper Slide Pins, nearly every configuration requirement can be satisfied. Duro Dyne's Damper Blade Slide Pin selection provides a low cost alternative to damper hardware such as straps, set screws and solid pins. Installation is as easy as 1-2-3.

1. Punch a hole in the Damper Blade
2. Position a Pin on the Blade
3. Lock the pin in position by tightening 1/4" hex nut after sliding the pin into the damper bushing.

ACCESS DOORS

Duro Dyne Access Doors provide convenient access to the inside of ductwork for testing and cleaning purposes. All doors are manufactured with an integral frame for minimal leakage. They are offered in a variety of sizes and styles for multiple applications including high pressure, ductboard applications and more.

INSULATED ACCESS DOORS TAB STYLE

The IAD Door has been designed to create an airtight seal utilizing a moisture, oil and grease resistant neoprene gasketing between the door to the frame and the frame to the duct. The door panel is constructed out of 24 gauge galvanized steel and is filled with a 1" 1-1/2 lb. fiberglass insulation (K factor .26+.03@75°F). The frame is 24 gauge galvanized steel with punched steel tabs along each side, which locks the frame into the ductwork. Smaller frame corner tabs make installation easy. Double camlock latches are used on doors 14" and larger. 12" and smaller have one camlock. Special sizes can be fabricated with multiple walls of steel or see-through panels or Cam-Lock only style.

Standard Sizes: Installation Note: All holes should be cut 1-1/8" smaller than the door.

YELLOW LABEL INSULATED ACCESS DOORS TAB STYLE

The YIAD Access Door is similar in specifications to the standard Insulated Access Door but is manufactured by industrial workers in the sheet metal union.

INSULATED ACCESS DOORS SELF STICK STYLE

Duro Dyne HSAD & CSAD access doors feature a self stick frame for easy application. Simply size and cut the hole, peel the release paper off the frame, press the door onto the ductwork and secure with screws. They are easy to position with no frame 'dove tails' to align and bend. Self Stick Access Doors are manufactured of 24 ga galvanized steel and feature a one inch wide gasketed frame, 1" thick fiberglass insulation. They have been tested to 10"SP with minimal leakage when properly installed.

YELLOW LABEL INSULATED ACCESS DOORS SELF STICK STYLE

The YHSAD & YCSAD Access Doors are similar in specifications to the standard Self Stick Insulated Access Doors but are manufactured by industrial workers in the sheet metal union.

VISION PANEL INSULATED ACCESS DOORS

Manufactured of 24 ga galvanized steel, a 1" 1-1/2 lb. fiberglass insulation and door to frame and frame to door gasket Duro Dyne IADV's provide an airtight seal with the added convenience of a vision panel. Square tabs make for an easier and safer installation process. A clear vision panel allows visual duct inspection effortlessly!

DUCT BOARD ACCESS DOORS

Duro Dyne's DBD Series Door is an insulated access door specifically designed for quick and easy installation onto ductboard. Simply cut the appropriate size hole in the duct, remove the release paper from the adhesive strip on the door, and press the door into position. Complete the installation by pushing the nails provided through the eight holes in the frame and capping them with the speed nuts, also provided, on the inside of the duct.

GASKETING

Wherever flanges are used in connecting parts of a duct system, the potential for air leakage exists. Besides contributing to energy waste, leaks can also create noise. Sealing of ductwork can be accomplished with the use of gasket which adheres to flanged surfaces. When this material is attached to a flange, which is then assembled to a second flange, the material is compressed and fills gaps and irregularities creating a seal.

VINYL FOAM (PVC)

Vinyl Foam is a low density PVC Foam. When this material is attached to a flange which is then assembled to a second flange, the material is compressed and fills gaps and irregularities creating a seal.

VINYL FOAM (PVC)			
ITEM#	CODE	DESCRIPTION	LENGTH

INSTRUMENT TEST PORTS

The **Instrument Test Port** has a durable cast zinc alloy construction with a heavy gauge zinc plated cap. Its Neoprene Expansion Plug can withstand up to 180°F and has resisted pressures up to 90 PSI when installed. The TH-1 accommodates 1" of insulating materials and has an inside diameter of 1-1/16". The IP-2 accommodates 2" of insulation material and has an inside diameter of 1-1/8". The IP-4 offers a 3/4" diameter access to the air stream. All are designed for high velocity systems. A flat neoprene mounting gasket is supplied. However, for maximum protection against leakage, we recommend using Quad Seal.

HANGING STRAP

Duro Dyne provides Hanging Strap fabrics that are waterproof, grease, oil & acid resistant, and have low smoke & flame development.

Designed for hanging:

- Flexible Duct
- PVC Vent Duct
- Duct Board Systems
- Light Weight Steel
- Duct Applications

HANGING STRAP			
ITEM#	CODE	DESCRIPTION	SIZE
10181	VDS200C	Vinyl Duro Strap	1-1/2" x 200'
10180	NS300	Nova Strap	1-3/4" x 300'

	VINYL DURO STRAP	NOVA STRAP
FLAME SPREAD & SMOKE DEVELOPMENT:	N/A	Less Than 25 / Less Than 50
TENSILE STRENGTH:	Warp-70 lbs./In. Fill-70 lbs./In	Warp-70 lbs./In.; Fill-70 lbs./In
HEAT RESISTANCE:	200° F	200° F
TEAR STRENGTH:	Warp- 8 lbs./In. Fill-11 lbs./In	N/A
FABRIC:	Black vinyl coated polyester fill	Black Woven Polypropylene
TOTAL FABRIC THICKNESS:	.022" Approx.	.025" Approx.
QUANTITY PER CARTON:	10 rolls (Conveniently packaged in a dispenser box with cutting blade)	24 rolls per box
ADDITIONAL INFO:	N/A	Resistant to Grease, Oil, Gasoline and Acid.

DYN-O-TIE®

Whenever your job calls for securing round flexible duct to outlets, pipes or fittings, you can do the job better, faster, and at a lower cost using **DYN-O-TIES**, flexible duct ties.

No tapes, no screws, no clamps. Position the flexible duct and slip a **DYN-O-TIE** around the flexible duct over the joint. Draw the **DYN-O-TIE** tight with our ratchet action hand tool. A push with the thumb completes the job by clipping off the excess nylon tab for the neatest and most secure connection you could want. Duro Dyne UV DYN-O-TIES are made to resist Ultraviolet rays and adverse weather conditions when used in outdoor applications.

DYN-O-TIES, when properly installed, provide secure, self-extinguishing joints when connecting certain types of flexible duct listed by Underwriters Laboratories Inc., class 1.

NYLON
6/6 V2 – available in five sizes
Self-extinguishing
Fungus inert
Normal service temp. range: – 40° F to 185° F
Test Results*: Nylon-175 lbs-

181B-C 13ER
MH19757
For use with UL nonmetallic
airducts and air connectors

Non-Metallic
Mechanical
Fastener

*Test Method: Tie is secured at both ends forming a loop. A weight is suspended from the bottom of loop to determine tensile strength of **DYN-O-TIE** strap.

STAINLESS STEEL DYNA-CLAMPS™

The Dyna-Clamp is an efficient way to secure flex or rigid round duct connections. The stainless steel band can withstand up to 60 PSI, as well as extreme temperature conditions. The band is secured in place at the bridge by a slotted hex head screw. This zinc plated carbon steel screw can be flipped up away from the band to offer a quick release when adjustments are needed. Dyna-Clamps are available in stock sizes ranging from a 7" diameter to 20". Two or more clamps can also be connected together to accommodate duct diameters over 20".

STAINLESS STEEL HARDWARE (CONTINUED)

1/2" SPEC SEAL™ UNIVERSAL REGULATOR SET (FOR DAMPERS UP TO 30")

The Spec-Seal Regulator Set utilizes a special rubber seal for applications up to 500°F constant temperature. It eliminates leakage and rattle via the Shaft Loc Mechanism in high pressure systems. The handle's unique design utilizes a highly-visible orange plastic cover showing the damper position. This kit includes 1/2" square bearing shafts. Individual parts available upon request.

Set Consists of:

- Regulator
- 2 Rubber Seals
- 2 Metal Washers
- 2 End Bearings
- End Bearing Support
