Gustafson G-3® Connection

Design by Diameter

Gasket connection for diameters 26" and smaller

"Leading Edge" for diameters 28" and larger

The Gustafson G-3 self-sealing duct system is based on a triple-lip profile, EPDM rubber gasket. This gasket is located in a groove at the end of the fitting. This design ensures that the rubber gasket is always held in the correct position.

When the fitting is inserted into the spiral duct, the gasket folds back forming a seal against the inside of the spiral duct eliminating the need for any duct sealer.

In order to achieve optimum sealing for all diameters, various gasket sizes are used as shown in the table below.

The standard Gustafson G-3 gasket is made from a material resistant to ozone, UV rays, and temperature fluctuations. A silicone gasket for special applications is also available. The standard Gustafson G-3 gasket is rated for temperatures from -20°F to +212°F (silicone gasket rated for temperatures from -94°F to +302°F).

Benefits of the Gustafson G-3 Duct System

- A complete line of self-sealing spiral duct and fittings
- Factory installed gasket - no loose parts
- Fast and easy installation
- Installation not contingent on weather
- Performance rated from -20°F to +212°F
- Triple lipped gasket minimizes the risk of leakage in the event of damage
- Meets SMACNA's Leakage Class 3
- Gasket U.L. classified rating (Flame Spread 0/ Smoke Developed 5) in accordance with ASTM standard E84-91a
- Rolled over edges for easier installation, reduces risk of injury and adds strength
- Adjustability - fittings can be rotated 360° during installation and still maintain the seal's integrity

Gasket Size by Diameter

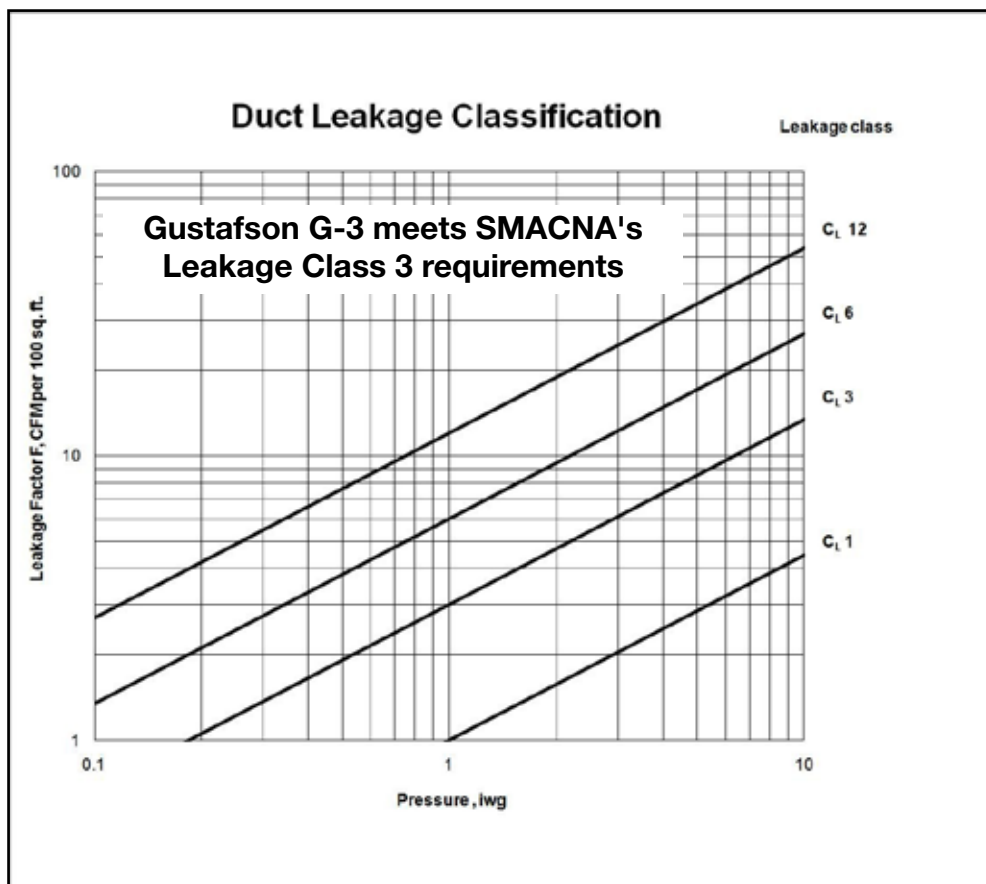

Size	7	9	11	14	20	30
Dia (inch)	3-7	8-11	12-20	22-36	38-58	60

Duct System Leakage Classification

The graph below represents a selected series of leakage classes as defined by the formula $C_L = F/P^{0.65}$. The formula defines leakage class as the relationship between leak rate, duct surface area, and pressure.

Since the calculation of leakage class is based on several relevant factors while percent leakage is based only on overall system air flow, leakage class is a more comprehensive method of assigning allowable leakage rates. This enables the designer to address all major system factors by simply assigning a leakage class.

Gustafson G-3 meets SMACNA's Leakage Class 3 requirements without the use of any duct sealants.

F = Leak rate per unit of duct surface (cfm/100 sq. ft.)

C_L = Leakage Class

P = Static pressure (iwg)

Assembly Instructions

Preparations for assembly

Check that ducts and fittings to be used in the system are Gustafson G-3 and are undamaged. All Gustafson G-3 fittings must be used with calibrated spiral duct certified by Gustafson.

Do not use ducts or fittings that have been damaged in such a way that they jeopardize the air tightness or structural strength of the system.

Store ducts and fittings in a well-ordered and weatherproof storage area to minimize the risk of damage.

Cut ducts at right angles. Carefully remove any burrs from cut edges. Installation is easier and the risk of damaging the gasket is reduced if there are no burrs.

Assembly

Start by inserting the turned-over edge of the fitting into the duct.

Check that the first lip of the gasket is in contact with the edge of the duct all the way around and sticks straight out so that the lip is not twisted in one direction or the other.

Push the end of the fitting into the duct. Turning the fitting slightly aids insertion. (Removal, if necessary, is also aided by turning.)

Secure the fitting in the duct using self-tapping screws or airtight pop rivets.

Fasteners should be positioned 1/2" from the bead to prevent damage to the gasket.

Placement of the fastening screws should be opposite from one another evenly spaced around the circumference, much like the procedure for tightening lug nuts on a tire (see diagram). Start where the distance between the duct and the fitting is largest. Screws should be placed approximately 1/2" from the bead in order to avoid damaging the Gustafson G-3 gasket. In the event of incorrect installation, holes caused by screws or pop rivets must be sealed before reassembly.

Quantities and sizes to be used are listed in the below table.

Duct Dia. (inch)	Screw Dia. (inch)	Quantity
3 - 5	1/8	2
6 - 10	1/8	3
12 - 24	1/8	4
26 - 50	1/8	6
52 - 60	1/8	8

Always start the first fastener at the largest radial gap between fitting and duct. Be sure to achieve even distribution around the circumference.

Carefully seal any holes left by measurements, removed screws, pop rivets, etc.

$$De = 1.30 [(ab)^{0.625}/(a+b)^{0.250}]$$

a = length of one side of rectangular duct (inch)
 b = length of adjacent side of rectangular duct (inch)
 De = circular equivalent of rectangular duct for equal friction and capacity (inch)

Source: 2001 ASHRAE Fundamentals, p. 32.10

Example

Convert rectangular duct 22" x 12" to equivalent round

a = 22, b = 12; from above table
 De = 17.6, use 18" diameter

Specifications

MATERIAL (*) not available in pressed construction

- Galvanized steel conforming to ASTM standards A653 and A924
- Stainless steel type 304L conforming to ASTM standard A240*
- Stainless steel type 316L conforming to ASTM standard A240*
- Aluminum T3003*

SURFACE FINISH

- Galvanized steel (galvanized in accordance with latest SMACNA HVAC Duct Construction Standards).
- Stainless steel type 304L - Mill Finish
- Stainless steel type 316L - 2B Mill Finish
- ProCoat (outside only) or ProCoat Plus (inside and outside) on duct and/or fittings
 - Standard color = white (additional color options available)
 - Average coating thickness of 4 mils (0.004 inch)
 - Coating to meet or exceed 1,000 hour Salt Spray Test per ASTM B117-97
- Antimicrobial - Coating containing antimicrobial compound complies with UL standard - not to exceed flame or smoke developed ratings of 25/50 and is EPA listed.

THICKNESS

Material thickness constructed from galvanized steel in accordance with the latest SMACNA's HVAC Duct Construction Standards for +10" water gauge pressure.

CONSTRUCTION

- Duct is of spiral lock seam construction with a mechanically formed seam locking indentation evenly spaced along the spiral seam. All spiral duct 8" diameter and larger shall incorporate multiple corrugations between spiral seams.
- Fittings shall be manufactured using one or more of the following construction methods:
 - Overlapped edges stitch welded along the entire length of the fitting
 - Standing seam gore locked and internally sealed
 - Button punched and internally sealed
 - Elbows 3" through 12" diameter will be die stamped and continuously stitch welded.

CONNECTIONS

Fitting ends shall be sized to slip-fit into spiral duct of the same nominal size. Fitting to fitting connections shall be made by use of duct size "MF" couplings. Duct to duct connections require fitting size "NP" couplings.

JOINT SEALING

Fitting ends are equipped with factory installed, triple-lipped gaskets. When installed in spiral duct per manufacturer's installation instructions, the gasket creates a seal against the interior of the spiral duct. The system tightness shall be factory warranted to meet SMACNA's Leakage Class 3 performance.

If no gasket is used, all joints must be sealed by the installer during the installation process. The type of sealant used as well as the method and level of application should be as directed by the specification and in accordance with the sealant manufacturer's published installation instructions.

GASKET

The gasket shall be EPDM rubber. The gasket is located in a groove at the end of the fitting and securely fastened. In order to achieve optimum sealing for all diameters, different size gaskets shall be used. The gasket shall be classified by Underwriters Laboratories for flame spread and smoke developed in accordance with ASTM E84-91a. A silicone gasket meeting the same performance may be offered by duct manufacturer for special applications.

NOTE: For systems under negative pressure, please refer to the Industrial Catalog or an Gustafson representative.

*** " — " = Not currently available

Tolerances for Spiral

Material Specifications

Gustafson components are made of galvanized sheet ASTM A653/A924.

Duct and fittings are also available in the following materials:

- G60
 - G90
 - 304 stainless steel ASTM A240*
 - 316 stainless steel ASTM A240*
 - Coated
 - Agion
 - Antimicrobial
 - Aluminum*
- (*) not available in pressed construction

Length Tolerances

Length -L, H, e, D, d	Tolerances
inch	inch
1 - 10	$\pm \frac{3}{8}$
12 - 16	$\pm \frac{5}{8}$
18 - 28	$\pm \frac{3}{4}$
30 - 50	± 1
52 - 60	$\pm 1 \frac{1}{4}$

Weight Tolerance

$\pm 10\%$

Thickness Tolerance

$\pm 10\%$

Angular Tolerance

Surface/Finish

Die stamped products of G90 construction.

Stainless steel 316L fittings provided with a 2B mill finish.

Coated products have a minimum surface hardness of 2H when tested per ASTM D33-63-92A with an average thickness of 4 mils inside and out. Epoxy is used on duct and fittings or a PVC can be applied on duct.

Fitting Slip Dimension

Our products are designed with a male/female slip connections. For gasket (G-3) connections, refer to the e-dimension listed in the chart on page 11. If flanges are utilized, add 3" per flange plus flange thickness to the published L (length) dimension as shown elsewhere in this catalog as depicted in the diagram to the right.

Factory-applied Flange	
Collar Length	Make-up Length
3"	3" + flange thickness

Spiral Duct

SR

Description

spiral lock seam duct

- SMACNA RL-1 spiral seam
- evenly spaced integral seam locking feature
- multiple corrugations on all duct 8" diameter and larger
- standard length: 120"
- built in accordance with the latest SMACNA HVAC Duct Construction Standard for +10 iwg
- available in diameters 3" - 60"

Order Example

SR - ØD - L

Dimensions

Standard length is 120" or 10'. Also available in lengths of 12" to 240"; aluminum is the exception with a maximum 120" length.

13

Elbows

14

Description

90° elbow

- die stamped
- continuous stitch welded
- rolled edges
- galvanized steel only
- available in diameters 3"- 12"
- note: 11" diameter is fabricated

Order Example

Gustafson G-3
BSG 90 - Ød1

Gustafson Nongasketed
BS 90 - Ød1

BSG 90 / BSFG 90

Description

90° elbow

- 5-piece gored, standing seam
- gore locked and internally sealed
- available in diameters 14"- 48"
- note: BSF/G 90 elbows 50-inch diameter and larger will be supplied as two BSF/G 45° elbows and an MF coupling

Order Example

Gustafson G-3
BSFG 90 - Ød1

Gustafson Nongasketed
BSF 90 - Ød1

Elbows

Description

90° elbow

- die stamped
- continuous stitch welded
- rolled edges
- galvanized steel only
- available in diameters 3"- 12"
- note: 11" diameter is fabricated

Order Example

Gustafson G-3
BG 90 - Ød1

Gustafson Nongasketed
B 90 - Ød1

BG 90 / BFG 90

15

Description

90° elbow

- 4-piece gored, standing seam
- gore locked and internally sealed
- available in diameters 14"- 48"
- note: BF/G 90 elbows 50-inch diameter and larger will be supplied as two BF/G 45° elbows and an MF coupling

Order Example

Gustafson G-3
BFG 90 - Ød1

Gustafson Nongasketed
BF 90 - Ød1

Elbows

16

Description

60° elbow

- die stamped
- continuous stitch welded
- rolled edges
- galvanized steel only
- available in diameters 3"- 12"
- note: 11" diameter is fabricated

Order Example

Gustafson G-3
BG 60 - Ød1

Gustafson Nongasketed
B 60 - Ød1

BG 60 / BFG 60

Description

60° elbow

- 3-piece gored, standing seam
- gore locked and internally sealed
- available in diameters 14"-60"

Order Example

Gustafson G-3
BFG 60 - Ød1

Gustafson Nongasketed
BF 60 - Ød1

Elbows

Description

45° elbow

- die stamped
- continuous stitch welded
- rolled edges
- galvanized steel only
- available in diameters 3"- 12"
- note: 11" diameter is fabricated

Order Example

Gustafson G-3
BSG 45 - Ød1

Gustafson Nongasketed
BS 45 - Ød1

BSG 45 / BSFG 45

17

Description

45° elbow

- 3-piece gored, standing seam
- gore locked and internally sealed

$$M2 = H2 + (d4 \times 0.5)(\cos(45)) - (d1 \times 0.5) + O2 - (d4 \times 0.5)(\cos(45))$$

$$CL1 = \frac{(d1 \times 0.5) + O1 - (d3 \times 0.5)(\cos(45))}{\cos(45)}$$

$$CL2 = \frac{(d1 \times 0.5) + O2 - (d4 \times 0.5)(\cos(45))}{\cos(45)}$$

Note: These dimensions apply for 45° only.
Please call for dimensions on special orders.

Offset

36

Description

one-piece offset

- 60° max angle of convergence
- max offset $Z1 \leq (\text{Ød1}) / 2$
- max length $L = 60"$

Note: SMACNA recommends that offsets be 30° or less

Order Example

Gustafson G-3
OSETG - Ød1 - L - Z

Gustafson Nongasketed
OSET - Ød1 - L - Z

OSETG

Couplings

Description

coupling used for joining spiral duct

- If \varnothing 3"-20", $L = \frac{3}{8}"$,
If \varnothing 22"-26", $L = \frac{1}{2}"$
If \varnothing 28"-60", $L = \frac{5}{8}"$

Order Example

Gustafson G-3
NPG - $\varnothing d1$

Gustafson Nongasketed
NP - $\varnothing d1$

NPG/MF

37

Description

coupling for joining fittings

- If \varnothing 3"-9", $L = 3\frac{5}{8}"$,
If \varnothing 10"-14", $L = 5\frac{1}{8}"$,
If \varnothing 16"-26", $L = 6\frac{5}{8}"$,
If \varnothing 28"-38", $L = 8\frac{5}{8}"$,
If \varnothing 40"-60", $L = 10\frac{1}{8}"$

Order Example

Gustafson Nongasketed
MF - $\varnothing D$

End Caps

38

Description

end cap for spiral duct

- If \varnothing 3"-20", $L = \frac{3}{8}"$,
If \varnothing 22"-26", $L = \frac{1}{2}"$
If \varnothing 28"-60", $L = \frac{5}{8}"$

Order Example

Gustafson G-3
ESG - Ød1

Gustafson Nongasketed
ES - Ød1

ESG/EPF

Description

end cap for fittings

- If \varnothing 3"-9", $L = 1\frac{5}{8}"$,
If \varnothing 10"-14", $L = 2\frac{3}{8}"$,
If \varnothing 16"-26", $L = 3\frac{1}{8}"$,
If \varnothing 28"-38", $L = 4"$,
If \varnothing 40"-60", $L = 4\frac{3}{4}"$

Order Example

Gustafson Nongasketed
EPF - ØD

Take-offs

Description

take-off/starting collar

- installed on flat side of duct or plenum
- available in diameters 3" - 60"

Order Example

Gustafson G-3
ILG - Ød1

Gustafson Nongasketed
IL - Ød1

ILG/ILRG

39

Description

stamped radiused bellmouth take-off

- available in 4"-16" (not including 11")
- installed on flat side of duct or plenum

Order Example

Gustafson G-3
ILRG - Ød1

Gustafson Nongasketed
ILR - Ød1

Dampers

DSG/DSWG

40

DSG

DSWG

Description

- manual balancing damper w/full blade
- for use in systems where a complete shut-off of air flow is not required
 - gasketed shaft-mounted load bearing bushing to minimize air leakage
 - integral shaft-blade assembly
 - 2" sheet metal insulation stand-off
 - locking blade quadrant w/damper position indicator
 - damper cup height = 2"
 - full fitting body assembly with bead stop

Also available:

DSWG– DS(G) damper with cable-operating option. Equipped with 20' cable.

Note: Dampers with Ød1 > 14" equipped with extended handle and a reinforced damper blade.

Dampers with Ød1 > 24" have 2" bracket in place of cup-shaped stand-off.

Order Example

Gustafson G-3

* 2" shaft extensions available

** 1" square tube shaft

Take-offs

Description

gasketed take-off with damper

- lengths (in):
 diameters 4" - 9" : L= 5½"
 diameters 10" - 14" : L= 5⅝"
 diameters 16" - 24" : L= 6⅜"
- shaft = 8 mm²
- 2" shaft extension available

Order Example

Gustafson G-3
DSILG - Ød1

Gustafson Nongasketed
DSIL - Ød1

DSILG/DSILRG

41

Description

gasketed bellmouth take-off with damper

- assembled with ILR(U) radiused bellmouth take-off
- lengths:
 diameters 4" - 9" : L= 7⅞"
 diameters 10" - 14" : L= 9"
 diameters 16" : L= 10¼"
- shaft = 8 mm²
- 2" shaft extension available

Note: 11" is not available

Order Example

Gustafson G-3
DSILRG - Ød1

Gustafson Nongasketed

Square-to-Round

RRTG

Description

square to round transition

- available in \varnothing 4" - 60"
- 2" raw edge rectangular end
- L = length, minimum 12"
- a = rectangular width
- b = rectangular height
- special order: offset styles available

Order Example

Gustafson G-3
RRTG - a - b - \varnothing d1 - L

Gustafson Nongasketed
RRT - a - b - \varnothing d1 - L

Duct-mounted register

DMR

44

Description

- supply/return register with adjustable double deflection blades and volume damper (loose)
- designed for direct mounting
 - rectangular register taps are not required
 - register made of galvanized sheet steel
 - damper made of electro-galvanized sheet steel
 - performance data available on request

Order Example

Gustafson Nongasketed
DMR - A x B

Register nom. size (in)	Min. duct diameter (in)	Free area (ft²)	Duct opening A x B (in)	Weight (lb)
13 x 3	6	0.18	12 3/4 x 3	2.4

Curved register

CREG

Description

The CREG is a supply/return register with a curved face

- adjustable double deflection blades
- allows for 4-way airflow and half length screwdriver operated volume adjusting scoop
- duct diameter must be 4" larger than height (H) of diffuser.
- performance data available on request

Materials and finish

Galvanized sheet steel (standard).
Custom finishes are available. Call for details.

Order Example

Gustafson Nongasketed
CREG - W x H - Duct Diameter - Material - Finish

Register nom. size W x H (in)	Min. duct diameter (in)	Free area (ft²)	Duct opening W X H (in)	Weight (lbs)
12 x 4	8	0.231	12 x 4	1.8
14 x 4	8	0.271	14 x 4	2.1
12 x 6	10	0.362	12 x 6	2.5
14 x 6	10	0.425	14 x 6	2.9
16 x 6	10	0.488	16 x 6	3.3

Drum louver

DRLAA

46

Description

- quality moisture-proof construction throughout with a gasket locked into a frame channel for a positive seal around the barrel
- extruded vanes – spaced 3 inches apart on bolt pivots to firmly hold deflection settings
 - adjustable pattern – vanes pivot easily to reduce
 - rotating barrel - 60° total, 30° up or down from the horizontal center line
 - aluminum mill finish frame and barrel
 - performance data available on request
