

Finally there is a WIFI thermostat available that is sold exclusively to HVAC professionals. Here are some of the features that make the TP-S-855i the best value in the WIFI market.

# **Easy Setup**

If you know how to install any Vive thermostat than you know how to install a connected model. The quickstart guide will walk the homeowner through the WIFI linking procedure.

### **Universal Subbase**

Fast, easy upgrade from existing Vive thermostats. No additional wiring necessary as long as C is connected.

### **Private Label**

Contractor contact info displayed in mobile app and on magnetic badge of thermostat to generate return business.

## **WIFI Optional**

All thermostats are fully functional without internet access. Unknown network password? New construction? No problem. Vive will help the homeowner get it connected when they get home.

## **Smart Grid Capable**

Works with many utility incentive programs. Learn more from your professional installer or Vive representative.

### **Active Alerts**

Receive alerts from anywhere. High and low temp. limits, connection status, and more.

Heat Pump (no Aux. or Emergency Heat)	Yes	Cool Only Systems	Yes
Heat Pump (with Aux.)	Yes	Light Commercial Features	Yes
Multi-stage Systems	Yes	Millivolt	No

**Stages** \* = 2 **Stages** for conventional heat.

### **Specifications**

#### **Smart Grid Capable**

Utility companies offer rebates, rate reductions and other incentives to homeowners who opt into demand response programs. These programs allow the utility companies to scale back energy usage during peak time periods. To learn more contact your professional technician or local Vive sales representative.

#### Save from Anywhere

Control and monitor the system's performance from anywhere. Homeowners can choose to receive tips on ways to maximize energy efficiency throughout the year.

The Active Alerts send notifications to your smart device if the system is not working correctly.
